Allowable Subject Matter

1> Claims 25-45 are allowed.

2> The following is an examiner's statement of reasons for allowance: Applicant's arguments and amendment are persuasive in claiming components located on a single computer. The prior art reference, and Gamache in particular, while seemingly related to the same problem at hand of migrating processes between different devices, they are silent as to processes, applications and a software module operating together on a single computer to provide the claimed functionality.

The newly amended method of claim 1 now is, in essence, directed towards transferring [inheriting] virtual addresses and hostnames between processes on a single computer and registering these virtualized parameters to a software module, also located and run on the same computer. This functionality, the interplay between the processes, application and software module on a single computer, are distinguishing over the prior art references. For this reason, allowance of claims 25-45 are believed to be proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
